

AVOTUS DELIVERY AND OPERATIONS ACHIEVES ISO 27001:2005 CERTIFICATION

Certification aligns and expands on the controls of ISO 9001:2008

Mississauga, Ontario – July 21, 2010 – Avotus Corporation, the leading provider of fully integrated “source to pay” telecom lifecycle management solutions, today announced its operational delivery engine “The ConJoin Group” has been certified 27001:2005 compliant by the International Organization for Standardization (ISO) and the British Standards Institution (BSI). By implementing a management system within a legislative and regulatory framework such as ISO 27001:2005, Avotus’ Operations have demonstrated compliance and reduced exposure to risk.

“We continue to achieve ISO certification levels unparalleled in the telecom management industry,” said John Blyzinskyj, President of Avotus. “We remain committed to maintaining the highest level of maturity in the business processes field by ensuring that our solutions meet all regulatory and client needs. This certification illustrates our ongoing efforts to provide the best possible telecom expense management solutions to our clients, and our commitment to customer satisfaction.”

To secure 27001:2005 certification, Avotus was carefully evaluated throughout the enterprise from operations and information systems to accounting and human resources. The analysis included a thorough audit of policies and practices governing operations confirming that these processes are applied with a commitment towards ongoing improvement. This external audit was in addition to the previous one conducted prior to achieving ISO 9001 certification earlier this year.

Avotus achieved ISO 9001:2008 certification in February of 2010.

About ISO 27001:2005

The ISO 27001 : 2005 Certification, established by the International Standards Organization, is a quality management system that sets a global standard for quality assurance processes. This certification also ensures that a company’s products and services are among the best in the world. ISO certification will help in the paradigm shift from people dependency to process centricity and will help in reducing cycle time for all delivery and support processes. The certification will help in reduction of cost, increasing the competitiveness and enhances the performance at all levels.

About Avotus Corporation

Avotus is the leader for groundbreaking technology-based total telecom cost management (TTCM) solutions. The company has a 20-year history of empowering companies of all sizes to gain lasting control over their complete worldwide communications environment through the effective management of their voice, data and converged communications spend.

Only Avotus brings together e-Procurement, expense, and usage management into a fully integrated solution. Avotus provides dramatic and verifiable cost savings of as much as 50% of an enterprise’s current communications spend and a triple digit in-year ROI.

Avotus offers the widest, deepest and most flexible solution set available including an onsite enterprise implementation, a hosted Application Service Provider (ASP) model, and a completely outsourced value-added managed solution.
